

Turtles in Cherating

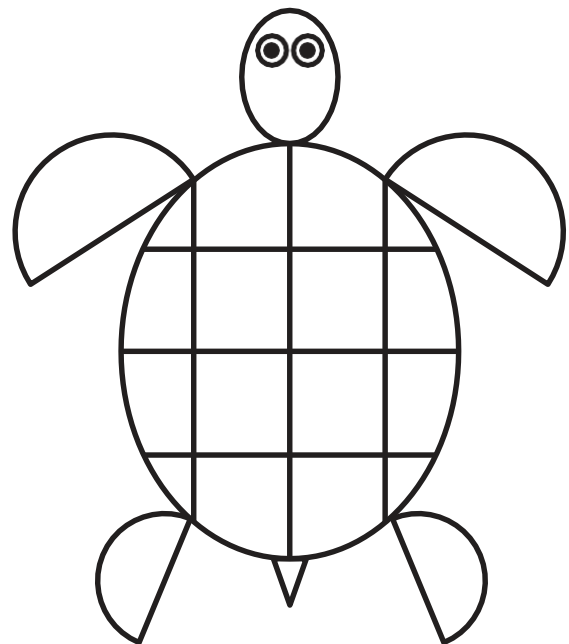

1. Start by drawing an oval shape for the turtleshell.

2. Draw another small oval for its head and small circles for its eyes.

3. Next draw legs (well flippers) - start with a first pair of semi-circle and then make another one. Also add a small triangle at the tip of the oval as a tail!

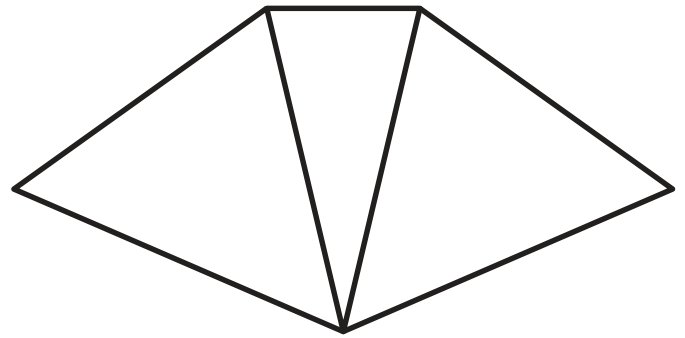

4. Last but not least, draw a few lines along the oval shape. This will give the turtle's shell some texture.

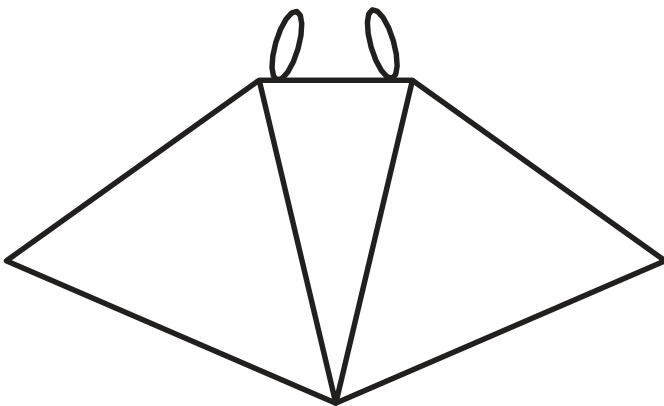

Manta Ray in Kani

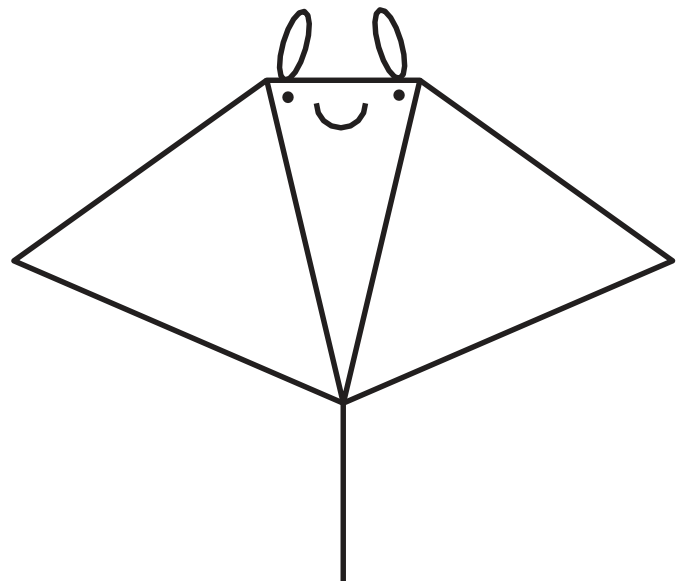

1. Begin by drawing a triangle to make up its body.

2. Next, draw two more triangles to connect the two sides of the body.

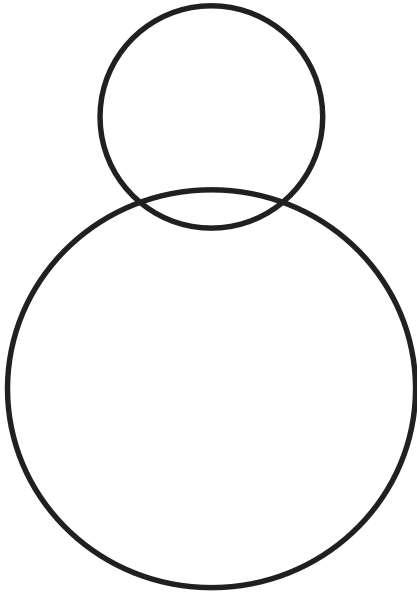

3. Draw two small ovals to make up its fins! Manta rays have two horn-shaped fins protruding from the front of their heads.

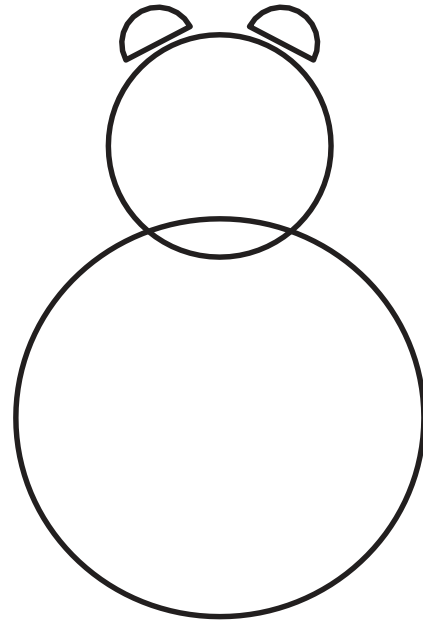

4. At the bottom of the body, draw a short, straight line as a guide for the manta ray's tail. Finish the drawing by adding the eyes and the mouth to complete this drawing of the Manta Ray.

Brown bear in Tomamu

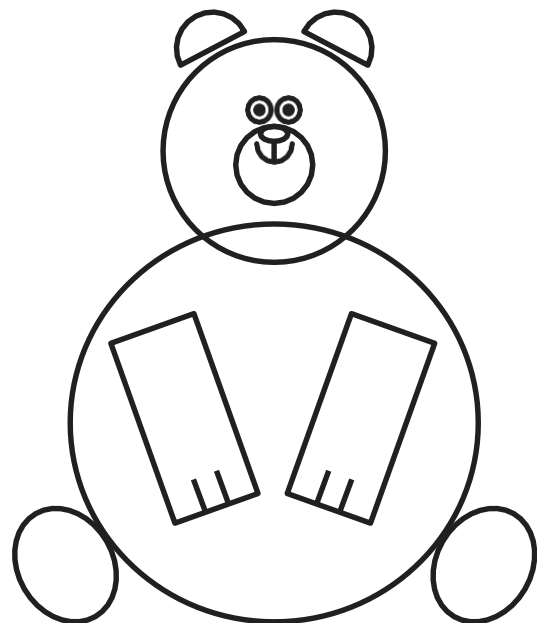

1. To start, draw a circle for the head. And then draw a bigger circle that loops around from the bottom right of the head to the bottom left for the body.

2. Next, draw the ears as two semi-circles attached to the top right and left of the bear's head.

3. Draw two small circles for its eyes. Draw the snout as an oval and shade another oval inside it for the nose.

4. Lastly, draw two rectangles as its arms and add two lines to make up its fingers.
