

Fun Clay

Bring your imagination to life when you learn how to make natural and non-toxic modelling clay at home. This is the perfect opportunity to make fun shapes as a family. Try making sculptures that remind you of vacation!

Ingredients

1

Start by mixing all of the dry ingredients together in a pot. Then add the oil and hot water. Stir it all together.

2

Ask an adult to help you "cook" the pot over medium heat until the mixture thickens.

3

When the clay begins to peel away from the bottom of the pot, take it off the heat and let it cool down.

4

Set the clay on a flat surface and start kneading it. If you want to give it a nice scent, you can add a few drops of vanilla or almond essential oil.

5

Divide your ball of clay into as many colors as you want to make. Put a few drops of the food coloring of your choice into each ball. Knead the clay again until you achieve the desired color.

6

Your clay is ready! You can create any shape that you wish. The clay will keep for several months in an air tight container.

Tip: if your clay dries out, get your hands a little wet and start kneading it. If it gets too runny, you can add a bit of flour to stiffen it.
