

Your kids are missing their time in school — but that doesn't mean that they're wasting their time at home. Here are some ideas you can try to engage your children in.

Fitness: PE with Joe Wicks

Also known as The Body Coach, this fitness trainer from the UK hosts a live PE session on his Youtube channel for the whole family, but the workouts are easy enough for kids to follow along. He goes live in the morning in the UK but the sessions are available on the channel long after.

Music: Learn How to DJ

Hey Mr DJ! Perfect for nine-year-olds to tweens, you don't need fancy DJ equipment. Download the free djay app by Algoriddim on your phone and

tablet and it'll take your child through very stage of mixing, teaching them the basics of decks and loops before giving them the freedom to mix and remix their library of music.

Computer Science: Learn the Basics

This is not just for kids — adults should join in too! Code.org launched its Code Break program recently. It is a free, live weekly webcast where members of the Code.org team teach coding and computer science to children and adults. The team sets weekly challenges for beginners, experienced coders and even those without computers.

Toddler Time: Captain Fantastic

Toddlers are a tough bunch to engage for a longer period, but Captain Fantastic may be of service. While the team usually specialises in children's entertainment for birthday parties, they now offers aimed at different age groups throughout the week via Facebook which get uploaded to their Youtube Channel too.

Language: Lingvist

If you've got a confident reader who loves languages, Lingvist has offered their education platforms for free for people to continue, or start, to teach and learn foreign languages. Choose from Russian, German, French or Spanish. The entire platform is free until 31 July but to qualify, a parent needs to sign up via Lingvist Classroom and add their child as a student.
