

## Instructions :

-  fold forward
-  fold backward
-  fold & unfold
-  open, spread

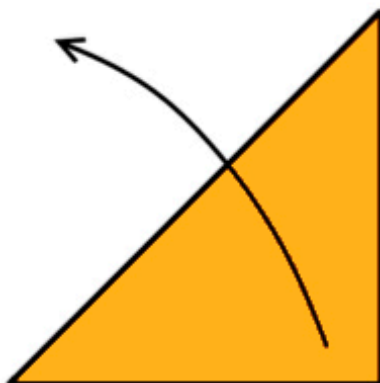

## How to square a paper sheet:

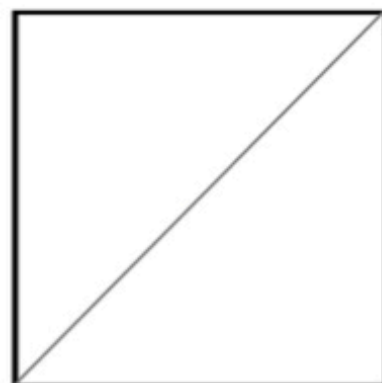

1. Take a A4 sheet from your printer; fold a corner on the opposite lower edge of the paper.

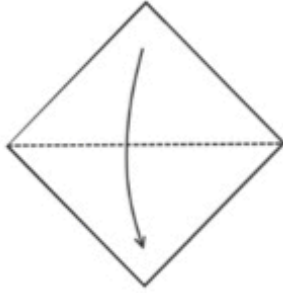

2. Now take a pair of scissors and cut the extra under the red line.

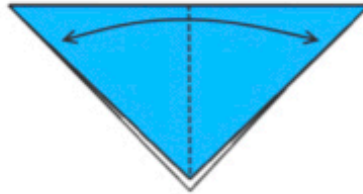

3. You'll get a triangle. open it.

4. You have a perfect square!

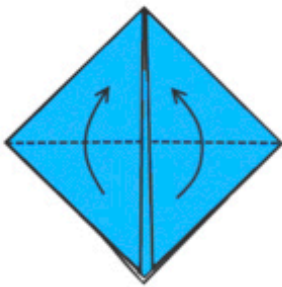

1. fold your sheet in half diagonally.

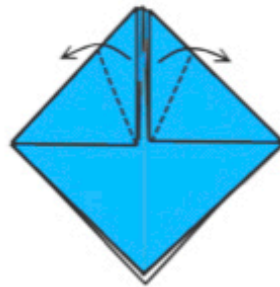

2. fold your triangle in half and unflod. keep the mark on the paper.

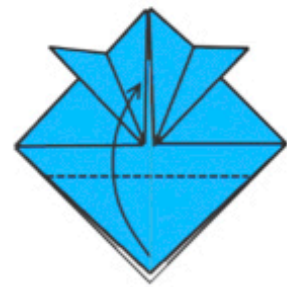

3. take each side of your triangle and fold down.

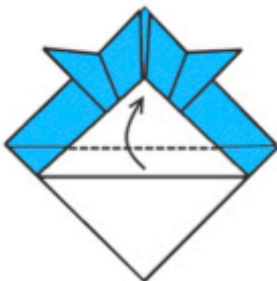

4. pull-up each pikes up

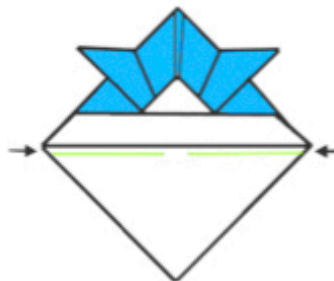

5. bend each pikes side out. these are the fins of your fish.

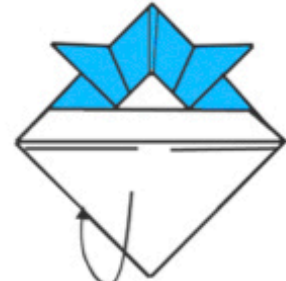

6. now gently raise-up the first layer.

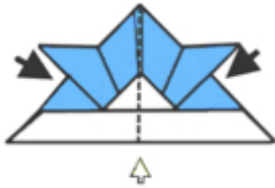

7. unfold the bottom

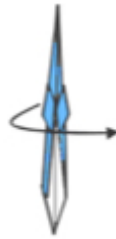

8 cut out straight, following the arrows

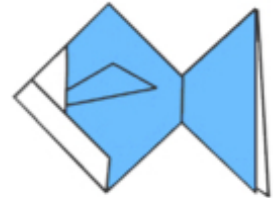

9. fold the last layer behind.

- 10.** You get a samurai helmet.  
Open it and and flatten each side.

- 11.** folding in process.turn it.

- 12.** Now, take the right thickness  
and revert it outside to realize the fishtail.  
You can also fold the inner fins  
so the fish can stand alone.
